You should carefully consider the investment objectives, risks, charges and expenses of the GuideStone Funds® before investing. A prospectus with this and other information about the Funds may be obtained by calling 1-888-GS-FUNDS (1-888-473-8637) or downloading one at GuideStoneFunds.com/Funds. It should be read carefully before investing.

There can be no guarantee that any strategy (risk management or otherwise) will be successful. All investing involves risk, including potential loss of principal.

¹Foreign securities involve risk from adverse changes in currency exchange rates. Securities of emerging countries may involve additional risks including price volatility, reduced liquidity, lax financial reporting requirements as well as political and economic instability.

²The Fund's volatility may be amplified by its use of short sales and derivatives. Short sales by a fund theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase. Leverage may increase the risk of loss and cause fluctuations in the market value of the Fund's portfolio to have disproportionately large effects or cause the NAV of the Fund generally to decline faster than it would otherwise.

³Convertible bonds are subject to interest rate risk, meaning values of existing bonds generally fall when interest rates rise. They also may decrease in value when the underlying common stock decreases in value.

⁴There is a risk that value-oriented investments may not perform as well as the rest of the U.S. stock market as a whole.

⁵The Institutional and/or Investor class of the Fund is new and has no and/or limited operating history for investors to evaluate.

⁶Small company stocks are generally riskier than large company stocks due to greater volatility and less liquidity.

⁷You could lose money by investing in the Money Market Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.

⁸The bonds held by the bond funds are subject to interest rate risk. Values of existing bonds generally fall when interest rates rise.

⁹The fund invests in high yield securities, commonly known as "junk bonds." While offering higher currency yields, these securities generally are considered speculative and are subject to greater default and liquidity risks than higher-rated bonds.

¹⁰Real estate investing involves risks not associated with investing in stocks. Risks include declines in the value of real estate, general and economic conditions, changes in the value of the underlying property and defaults by borrowers. The value of assets in the real estate industry may go through cycles of relative underperformance and outperformance in comparison to equity securities markets in general.

¹²The MyDestination Funds ("Funds") attempt to achieve their objectives by investing in the GuideStone Select Funds. The Funds are managed to a retirement date ("target date") by adjusting the percentage of fixed income securities and equity securities to become more conservative each year until reaching the retirement year and then approximately 15 years thereafter. The target date in the name of the Funds is the approximate date when an investor plans to start withdrawing money. By investing in the Funds you will also incur the expenses and risks of the underlying Select Funds. The principal risks of the Funds will change depending on the asset mix of the Select Funds in which they invest. You may directly invest in the Select Funds. The Funds' value will go up and down in response to changes in the share prices of the investments that they own. The amount invested in the Fund is not guaranteed to increase or against loss the original investment guaranteed at the target date. It is possible to lose money by investing in the Funds.

¹³Target Risk Funds ("Funds") attempt to achieve their objectives by investing in the GuideStone Select Funds. By investing in the Funds you will also incur the expenses and risks of the underlying Select Funds. The principal risks of the Funds will change depending on the asset mix of the Select Funds in which they invest. You may directly invest in the Select Funds. The Funds' value will go up and down in response to changes in the share prices of the investments that they own. It is possible to lose money by investing in the Funds.

GuideStone Personal Advisory Services is a fee based service available to investors in personal investment accounts and non-ERISA retirement accounts offered by a GuideStone affiliate. An advisory fee for the service is assessed quarterly and based on total assets in the account. These fees are in addition to the underlying mutual fund fees. Advisory services are offered through GuideStone Advisors, a SEC Registered Investment Adviser. GuideStone Advisors is a controlled affiliate of GuideStone Financial Resources. For more information about the firm, products and services please review the GuideStone Affiliate Form CRS (http://www.guidestonefunds.com/-/media/Funds/files/pdf/Affiliated_Form_CRS).
